Help first, sell second

Every US prospect gets a piece of real Karas expertise before we ever ask for a call.

TAM ≈ $350M a year
~7,000 US B2B tech companies at Series A–B

SAM ≈ $30–75M a year
1,000–1,500 fresh-signal accounts a year in our focus

SOM ≈ $200–350K in year 1
0.5–1% of SAM at ~50 accounts a week

1 Act on moments, not lists

- **Daily signal watch:** funding rounds, sales-leader hires and US launches (Crunchbase, LinkedIn, Clay).
- **A fresh signal sends the account into the whole ready-made sequence at once.** No signal, no outreach.
- **Focus:** US AI and B2B SaaS at Series A–B, plus European and Southeast Asian companies launching in the US.

2 Open with a mini GTM Scan

- **Before touch 1,** AI research and a Karas expert prepare 3 observations on positioning, pricing page and sales motion, with an annotated screenshot where it helps.
- **Touch 1 delivers them as text.** Next: a LinkedIn voice note and Sergey's Founder Studio video, openly an AI avatar.
- **Later:** a personal "Karas × Acme" page built with Digital Showroom.
- **Start with ~50 accounts a week,** each passing a 5-point QA checklist.

3 Earn US trust, then convert

- **US proof up front:** case studies with numbers and 70+ years of GTM at US public companies.
- **Warm channels next to outbound:** VC platform teams, US revenue communities and visibility in AI search.
- **One path:** Scan ($890) → Map ($9,900) → GTM or Product Engineering, replies within 2 hours in US hours.
- **Tools roll out step by step:** A/B tests, split by Tiers 1–3.

Measured weekly: positive replies · meetings booked · Scan → Map conversion

Scale only what converts

Market figures are estimates based on PitchBook-NVCA, Carta and Sacra data plus own assumptions. · Prepared by Ishkhan Khchoian for Karas Systems · November 2026
