Win US clients one signal at a time

Build the approach first, aim it second, deliver it the American way. Quality first, scale second.

TAM ≈ $350M a year
~7,000 US B2B tech companies at Series A–B

SAM ≈ $30–75M a year
1,000–1,500 fresh-signal accounts a year in our focus

SOM ≈ $200–350K in year 1
0.5–1% of SAM at ~50 accounts a week

1 One signal, the whole funnel

- **Four US signals:** a Series A–B round in the last 90 days, a first sales or marketing leader, a new CRO, a US launch.
- **Touch 1 within 48 hours:** a founder note that names the signal. **Touches 2–3:** a LinkedIn message and a short case from a similar company.
- **Start with ~50 accounts a week.** Each passes a 5-point QA checklist before anything is sent.

2 Aim where we win

- **US Series A–B B2B SaaS and AI** where sales still run through the founder.
- **European and Southeast Asian tech companies entering the US.** We already work in both markets.
- **VC and PE portfolio companies** through fund platform teams: a steady flow of warm intros.
- **Tiers 1–3** by signal strength decide how personal each touch is.

3 Deliver the American way

- **Proof before pitch:** 2–3 US case studies with numbers and 70+ years of GTM at US public companies.
- **A clear ladder:** GTM Scan ($890, 72 h) → GTM Map ($9,900) → Cluster Outreach or Product Engineering.
- **US hours (ET/PT),** replies within 2 hours, CAN-SPAM-compliant outreach.
- **Every new tool goes live through an A/B test,** one tier at a time.

90-day pilot · weekly report: positive replies, meetings booked, Scan → Map conversion

Quantity never eats quality
