PROFILE

I am currently COO of **SayWhen.am**, an early-stage product building AI voice agents that handle inbound and outbound business calls — natural conversation instead of phone menus, multilingual, integrated with a client's CRM and calendar, with transcripts and call analytics. The product works; we are taking it to market and deliberately finish each deployment around the specific client, so my week is discovery calls, scoping what a given customer actually needs, and turning that into what gets built next.

Before this I spent six years on the operating side — running up to 12 complex projects in parallel, coordinating 8 specialists, and rewriting the processes two organisations still work from. That combination — operating discipline plus hands-on product work with real customers — is what I bring to a product team.

WHAT I ACTUALLY DO IN PRODUCT

- **Customer discovery, for real.** Our whole go-to-market is discovery-led: every prospective client gets interviewed about their call flows before anything is configured. I have also run several hundred structured client-intake interviews in a previous career — the skill of asking past the stated request is the one I have practised longest.
- **Scoping a raw product into a shippable one.** Deciding what to build for the client in front of you, what to generalise, and what to refuse is the daily 0-to-1 judgement call. I make it with engineers, not at them.
- **Requirements engineers can act on.** My rewritten workflows, templates and checklists at M&M became the team default. Writing something precise enough that other people execute it without me is the part of the job I enjoy most.
- **Where conversational products break.** Retrieval that returns the plausible answer instead of the right one, handover to a human, and the gap between what callers actually say and what the happy path assumed. I have hit all three in production.
- **Evidence over opinion.** Six years of legal analysis: read a dense corpus, find the fact that decides the outcome, defend it in writing against a hostile reader. That is the same muscle as defending a prioritisation call with data.
- **Domain range.** Law, construction, events and retail — I can interview a lawyer, a site manager or a venue producer in their own vocabulary. For a B2B product, the discovery bottleneck is usually the interviewer, not the user.
- **Three languages.** Armenian C2, Russian C2, English C1 — the same three our product ships in.

PRODUCT & INDEPENDENT WORK

Chief Operating Officer — SayWhen.am (AI voice agents for business)

2026 – present

- Own operations and the client-facing half of the product: discovery calls, scoping each deployment, and feeding what customers ask for back into the roadmap.
- Product handles inbound and outbound calls in **Armenian, Russian and English**, with CRM and knowledge-base integration, calendar booking, live transcripts and call analytics.
- Early stage and pre-scale: the build is working but intentionally finished per client, so prioritising what to generalise is a live weekly decision. Demo available on request.

Independent consultant — legal, research and commercial projects Feb 2026 – present

- Business research for a water production line.
- Corporate structure design for a crypto trader; advised a St. Petersburg entrepreneur on setting up a crypto-exchange operation in Armenia.
- IP assignment for popular musicians' works; CPA/affiliate account management; sale of family real estate.

OPERATING EXPERIENCE

Senior Case Manager — M&M Document Preparation Jun 2025 – Feb 2026

- Up to **12 complex client projects in parallel**, end to end, against immovable deadlines; coordinated **8 specialists** against written acceptance criteria.
- Rewrote the workflows, templates and checklists; they became the team standard.

Event / Project Manager — Hosq Corp. Jan 2025 – Jun 2025

- Live events for **100–3,000** people — Miro's corporate conference, festivals and touring shows — several in parallel, on dates that could not move.

Senior Paralegal — Shamayev Business Law Corp. · Paralegal — Bloomrich Law Firm Feb 2023 – Aug 2024

- Built and taught the **Paralegal Academy**, an internal training programme used by **50+ people**; carried key accounts with full autonomy.

Judge's Associate — Arbitration Court of the Magadan Region Nov 2021 – Dec 2022

- **200+ parallel cases, 30+ hearings a week**, covering three roles at once.

Administrator / Project Manager — LLC "SIS" (construction & retail) Jun 2015 – Sep 2019

- **15+ projects**, up to three sites at once, teams of 2–20; tenders, procurement and contractors.
